Back life to the sea and value to the land

Add value to plastic

Back Sprought

Issues of Marine Plastic

Marine plastic, the culprit of pollution and destruction of the marine ecosystem

Proportion of plastic to marine waste

Accidents caused by floating objects in the last 5 years

887

Dead sea turtles found with plastic in stomach

20 out of 38

Years taken for plastic decompostion

over 500 years

Up to 10% of plastic produced worldwide ends up in the sea (estimated 500 million tons).

Plastic accounts for 82% of marine waste.

The ratio of fish vs. plastic is expected to reach 1:1 by 2050.

Plastic floats under the water surface, hard to collect, and hence prevention is the key.

Plastic takes 500 years to decompose but still remains harmful as microplastic.

Add value to plastic Marine Plastic Collection & Utilization Network Project Manual on the Marine Plastic Collection & Utilization Network Project 2. Process

Process

Marine Plastic Collection and Utilization Network

Obtained an Ocean Bound Plastic (OBP) certificate, first time in Korea

Process

Particip ants

Activities

Oil hold cleaning companies, Korea Coast Guard

Step 1

Build network with Korea Coast Guard and run public campaigns Collaborate with oil hold cleaning companies and select collection sites

Discuss measures for efficient waste collection

Conducted campaigns to crack

Step 2

Oil hold cleaning companies, Hyosung TNC

Build well-organized collection and management systems Build networks to recycle marine plastic into fabric

Sack to plastic collection and daily collection activities records Hyosung TNC produces marine plastic-recycled fabric in partnership with YGPA.

- Process
- : plants in **Gwangyang Port** > **Gimpo** > **Incheon** > **Goryeong** > **Gumi**

Step 3

Control Union

Obtain an OBP certificate (to get a due recognition as recycling marine plastic)

Step 4

Social enterprises, clothing manufacturers

Produce and sell goods made from recycled marine plastic

YGPA produces goods on its own or has fashion brands manufacture goods

YGPA's achieve ment

down on plastic dumping in partnership with Coast Guard.
Signed agreements with 2 oil hold cleaning companies in Yeosu&Gwangyang Ports and selected two collection sit
Prepared incentives for marine plastic collectiones.

Obtained an Ocean Bound Plastic (OBP) certificate, first time in Korea

Produced marine plasticrecycled goods

- Bags (200), safety vests (640),
- traffic lane control blocks (180)

Fashion brands manufacturered goods

- bags ([Pleats Mama)
- clothes (The North Face)

Add value to plastic Marine Plastic Collection & Utilization Nativork Project

Manual on the Marine Plastic Collection & Utilization Nativork Project

- Networking with Korea Coast Guard
- ② Collaboration with Oil Hold Cleaning Companies and Selection of Collection **Sites**
- ③ Discussion about Measures for Efficient Collection

Step 1 Network with Korea Coast Guard and Public Camapaigns

Korea Coast Guard

Step 1

Build network with Korea Coast Guard and run public campaigns

During inspection of arriving vessels, provide guidance on separate plastic discharge and crackdown on plastic dumping at sea

Cooperation to prevent the generation of marine plastic at source

Publicize the Marine Plastic Collection and Utilization Project with arriving vessels

Production and distribution of campaign stickers and plastic collection sacks in joint with Korea Coast Guard

Step 1 - Network with Korea Coast Guard and Public Camapaigns

Publicize the resource circulation project

: Distribute plastic collection bags and manufacture stickers for collection boxes aboard the ships

Guidance on separate plastic discharge, ban on plastic dumping during arriving vessels inspections

Consultation to prevent marine plastic dumping

YGPA-KCG MOU to ban plastic dumping

Stickers and sacks for separate plastic discharge

Manufacture 10,000 sacks for marine plastic collection

Sacks to collect PET and general plastic

Campaign to stop plastic dumping at sea

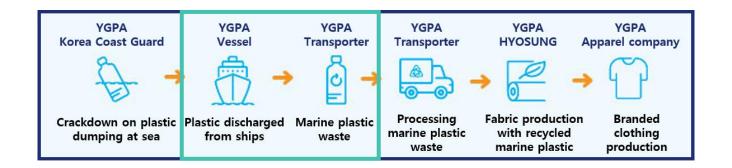

Step 1 - Collaboration with Oil Hold Cleaning Companies & Selection of Collection Sites

oil hold cleaning companies

Step 1

Collaboration with oil hold cleaning companies & selection of collection sites

oil hold Cleaning companies

Check the list of oil hold cleaning companies and select participants in the project
Sign MOUs to build partnership

Collection sites

Select sites for efficient collection and separate discharge

- under direct management by YGPA
- efficient collection and transporation of plastic
- sufficient area for separate discharge

Install facilities for separate collection of plastic (fence, notice board, etc.)

Step 1 - Collection and Sorting of Marine Plastic

Collection and sorting of marine plastic - Sorted into PET and general plastic

Plastic

14.8 tons collected and sorted

Add value to plastic Marine Plastic Collection & Utilization Network Project

Manual on the Marine Plastic Collection & Utilization Network Project

- Well-organized Collection and
- ② Network to Produce Fabrics with Recycled Marine Plastic Waste

Step 2 - Well-organized Collection and Management Systems

oil hold cleaning companies

Step 2

Build well-organized collection and management systems

Oil hold cleaning companies

Keep daily marine collection activities records

Date, quantity and source(vessel) of plastic waste collection

YGPA

Manufacture and distribute sacks to collect plastic waste from vessel

Distribute sacks to arriving vessels in cooperation with oil hold cleaning companies and Korea Coast Guard

Operate well-organized control systems
(e.g. collection quantity records by company, on-site inspection)

Manage collection amount by company, correct record-keeping, and conduct on-site inspections

Step 2 - Systematic Management of Network and Performance

Well-organized management systems for marine plastic waste collection

(example)

Designation of managers at oil hold cleaning companies

Daily collection activities records by oil hold cleaning companies

Add value to plastic Marine Plastic Collection & Utilization Network Project Manual on the Marine Plastic Collection & Utilization Network Project

Ocean Bound Plastic(OBP) Certification

Control Union (global certifier)

Step 3

Acquire an Ocean Bound Plastic (OBP) certificate

What is OBP?

Jointly developed by 'Control Union', an international certification agency with more than 70 overseas branches, and 'Zero Plastic Oceans', an NGO

To certify the collection, management, recycling, etc. of plastic waste collected at sea

Aimed at reducing plastic waste dumped at sea

Add new value to plastic waste collected at sea

Step 3 - OBP Certification

Acquired an Ocean Bound Plastic(OBP) certificate for the first time in Korea

① Production of Recycled Goods

Social enterprises

Step 4

Produce goods with fabrics made from marine plastic waste

Branded clothes (The North Face)

Pleats Mama

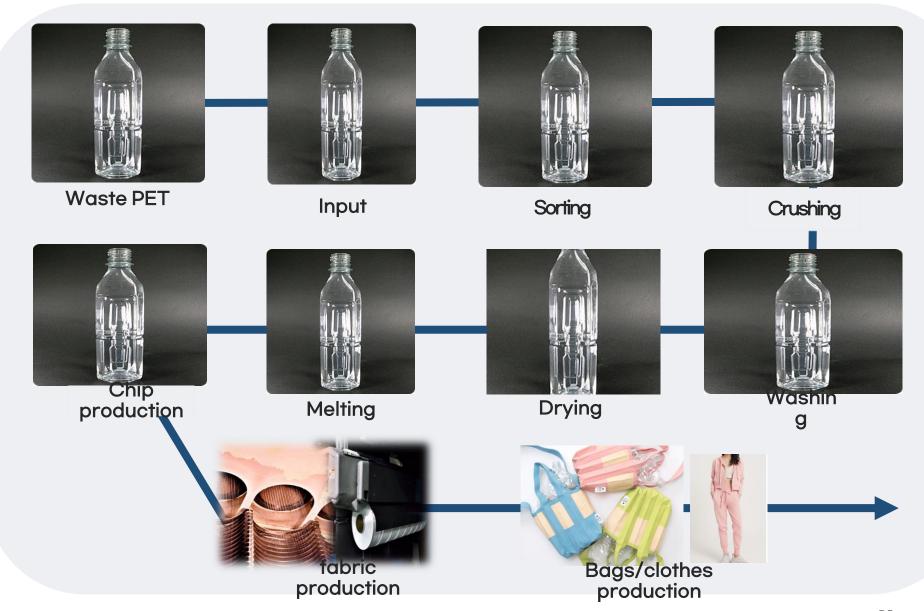

Social enterprise (hiring people with severe disabilities)

Support startups (run by young enterpreneurs)

- Develop, produce and sell goods made with marine plastic waste-recycled fabrics
- Fashion companies produce&sell goods
 Encourage ethical consumption, promote corporate value, secure social sustainability
- O Produce goods in partnership with social enterprises Create social value and jobs

Process to manufacture goods with marine plastic waste

Eco-friendly fashion brand, Pleats Mama (goods made from marine plastic waste)

Produce upcycling bags and safety vests in partnership with a local social enterprise hiring workers with severe disabilities (Songgwang Happy Town)

Manufacturer located in Yeosu, Jeollanam-do (hiring about 20 workers with severe disabilities)

Recycled bags (200)

Recycled safety vests (640)

Produce and use traffic lane control blocks made from recycled plastic in partnership with

Recycling through social enterprises

Produciton of traffic lane control blocks (180)

Set up recycled goods at the port

Promotion of the Marine Plastic Collection and Utilization Project

Recycling Campaign at World Marine Center (in YGPA head office building)

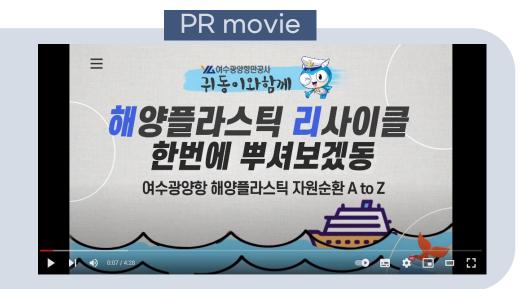

Installed 23 recycling boxes on 19 floors of the head office building to engage employees in the campaign

Promotion of the Marine Plastic Collection and Utilization Network Project

Open a PR hall for the Project in World Marine Center (in YGPA head office building)

Promote and share the results and values of the project with citizens and relevant organizations by exhibiting marine plastic recycling processes and recycled goods.

Add value to plastic Manual on the Marine Plastic Collection and Utilization Network Project

Thank You.
