TO WHOM SO EVER IT MAY CONCERN

We are writing this letter to recommend the mUnity platform, developed by Maqta Gateway, a part of AD Ports Group.

At G42, Maqta Gateway's secure digital solution, mUnity, provided us with a forensically detailed overview of the vaccine distribution process, supporting us in vital decisions on areas such as temperature integrity, demand planning and security.

With the ability to adapt to multiple journeys, different vaccine characteristics, and specific stakeholder requirements, mUnity enabled us to trace each shipment's progress from sourcing and storage to distribution in real time. This flexibility contributed towards creating trust and confidence in the reliability and safety of our supply chain process that is vital for medical supplies."

Thanking you

Yours sincerely,

For **G42 Pharmaceuticals Manufacturing LLC**
