

32 Biohut Pylon

- Only the pylons in the 2 inner rows will be equipped to keep the biohut at a reasonable distance from the vessels.
- 4 modules on each Pylons to give a maximum of complexity and interconnectivity in a small area.

32 Biohut Pylon

-All the modules will be installed at the same depth (-30cm below the lowest tide level). This solution provides a better security during the installation.

Besides, the modules will stay visible from the surface, making it easier for potential inspection and monitoring.

- 8 mini Biohut will be installed on one standard Biohut of each pillar
