

PORT OF VIGO IN COMBATING CLIMATE CHANGE

EMISSIONS REDUCTION

The Port of Vigo, through the Blue Growth Plan, presented in Malta (October 2017), the OUR OCEAN PORT OF VIGO commitment, committing to reduce its emissions (CO₂, SOX, NOX) by 30% and achieve 3% of energy self-sufficiency by 2022. This purpose is closely related to the SDGs

RENEWABLE ENERGY

ENERGY EFFICIENCY

ALTERNATIVE ENERGIES

EMISSIONS OFFSET AND MITIGATION

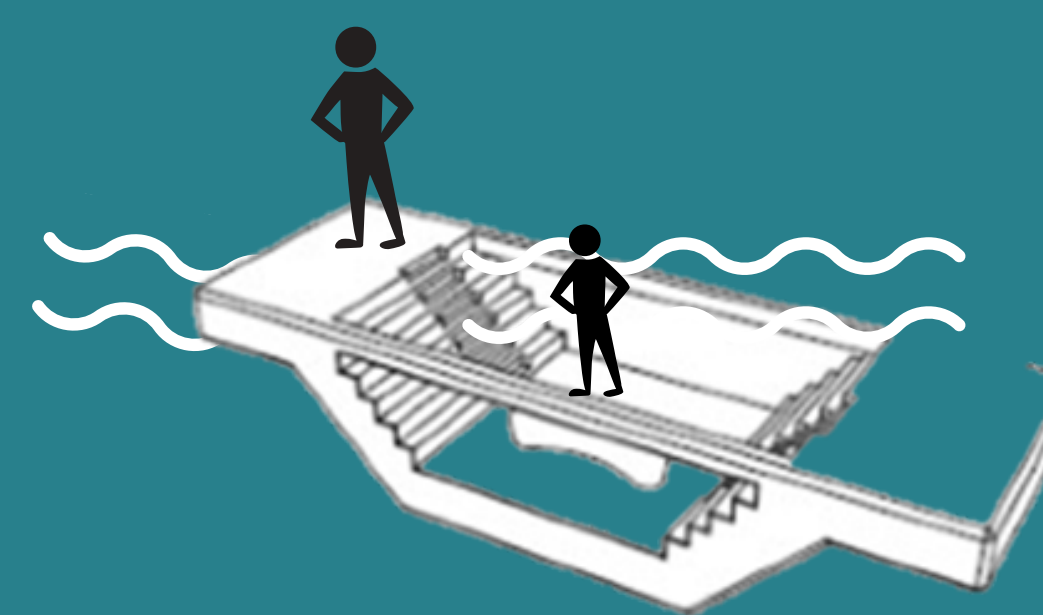

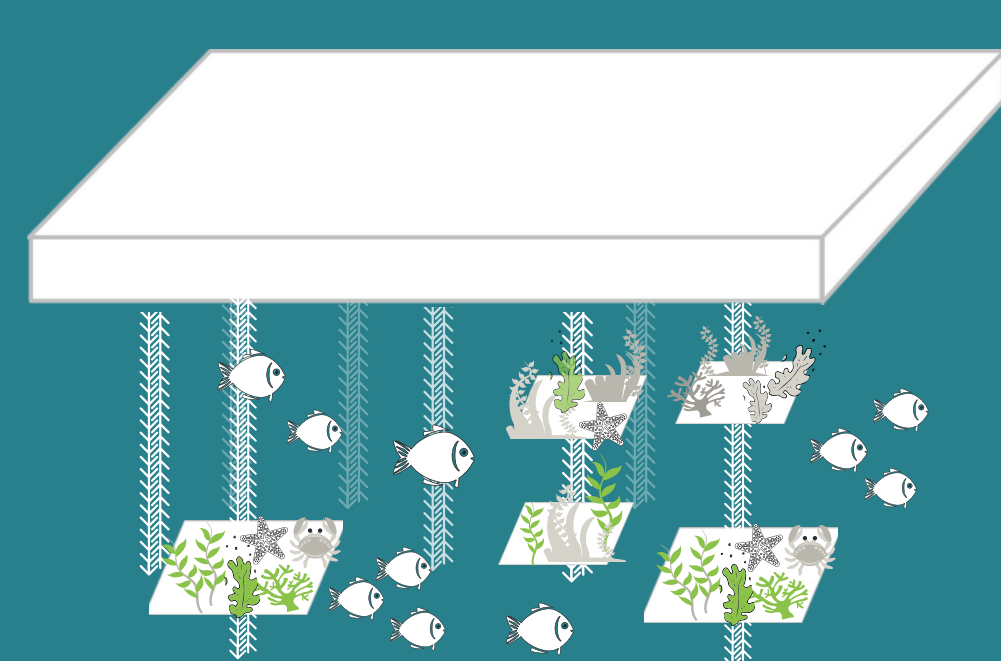

The Sunset Dock project is framed within the Blue Growth Strategy, a pioneering plan that seeks to enhance biodiversity through the use of artificial systems that generate habitat in the ports. Another project's objective is to serve as awareness, knowledge and enjoyment for the citizens.
