PIANC – IAPH – WG 174

23 MARCH 2018

The World Ports Sustainability Program aims to demonstrate global leadership of ports in shaping a truly sustainable supply chain for the future and assists ports worldwide in creating sustainable added value for the communities and wider regions in which they are embedded. Pick-up the challenge to help us shape the WPSP program by **contributing to one or two of the morning and afternoon sessions.**

These sessions will set the scene for the role that the ports will play regarding the implementation of the UN Sustainable Development Goals the coming years, so be involved.

09:00 – 09:10 am

WELCOME

Location:
Port House

Mr. Patrick Verhoeven – Coordinator WPSP
and Managing Director IAPH

09:10 – 09:30 am

PRESENTATION

Location:
Port House

Wayne Visser – Professor of Integrated Value
and Holder of the Chair in Sustainable
Transformation at Antwerp Management School

10:00 – 12:00 am

WORKSHOP SESSION 1

Location:
Port House

CLIMATE & ENERGY

WORKSHOP 

Ports subscribe to the Paris Climate Goal which aims to keep global warming well below 2°C. Building on the output of the World Ports Climate Initiative, port community actors can collaborate in refining and developing tools to facilitate reduction of CO2 emissions from shipping, port and landside operations. In addition, they can take initiatives to enable energy transition, improve air quality and stimulate circular economy.

Potential topics: energy efficiency, circular economy, bio-based economy, renewable energy, CO2 and infrastructure, clean ship incentives, deployment of alternative transport fuels

COMMUNITY
OUTREACH AND

WORKSHOP 

actors strive for dialogue with urban stakeholders to offer innovative cross-over services that contribute to the attractiveness and resilience of port cities.

Potential topics: stakeholder management, sustainability reporting, community outreach, city-port relations, employment, education, spatial planning, nature in ports, port culture, externalities of port operations

GOVERNANCE & ETHICS

WORKSHOP ▾

Principles of good corporate governance are increasingly being introduced to port authorities, regardless of their ownership. Furthermore, all port community actors should be encouraged to uphold high standards of ethics and transparency.

Potential topics: transparency, integrity, equal rights and opportunities, fair trade, anti-corruption, responsible supply chains

12:00 am – 01:00 pm **LUNCH**

Location:
Port House

01:00 – 03:00 pm **WORKSHOP SESSION 2**

Location:
Port House

RESILIENT INFRASTRUCTURE

WORKSHOP ▾

Port and port-related infrastructure aim at anticipating demands of maritime transport and

working with nature, ecosystems management

SAFETY & SECURITY

WORKSHOP ▾

In ports a mixture of regulatory duties and responsibilities exist related to ensuring safety and security of ship and cargo operations within the port as well as the enforcement of applicable laws and regulations in these fields. With the advance of global terrorism and digitalisation, security problems have obtained an entirely new dimension.

Potential topics: cyber-security, protection of critical infrastructure, ISPS, nautical safety, labor safety, responsible care

CLIMATE & ENERGY

WORKSHOP ▾

Ports subscribe to the Paris Climate Goal which aims to keep global warming well below 2°C. Building on the output of the World Ports Climate Initiative, port community actors can collaborate in refining and developing tools to facilitate reduction of CO2 emissions from shipping, port and landside operations. In addition, they can take initiatives to enable energy transition, improve air quality and stimulate circular economy.

Potential topics: energy efficiency, circular economy, bio-based economy, renewable energy, CO2 and infrastructure, clean ship incentives, deployment of alternative transport fuels

03:15 – 04:00 pm

WRAP UP AND CLOSING

Location:
